## Parts List

(4) ZENITH GARDEN HOOPS (8 sections)

## Assembly

Once your HOOPS are assembled, drive the self-staking feet firmly all the way into the soil up to the first rung.  
*Note: use in firm soil only—not recommended for loose or sandy soil.*

We recommend spacing your hoops 32" apart.  
Four hoops per 8' is ideal for optimal fabric support.

Designed for use with our all-natural cotton garden covers and metal clips — find these and more at
